### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 5-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The disclosure, as originally filed, failed to provide support for "forming an opening in a metal foil of one of said metal foils and said insulting substrate" (claim 5, lines 5-6). A layer of metal foil is formed on each of the front surface and the back surface of the insulating substrate. However, there is no support for forming another "metal foil" on the one of the metal foils. Further, there is no support for "forming an opening" in the another "metal foil."
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: forming an opening in the metal foils and the insulating

Art Unit: 3726

substrate, forming a first resist pattern on the metal foils, removing the first resist pattern, forming a second resist pattern, etc.

Claims 3-4: "said land" is vague and indefinite since there is no positive step of forming "a land" in claim 1.

Claim 5, lines 5-6: Is "a metal foil of one of said metal foils" referring to one of the layers of the metal foil or another "metal foil"?

Claim 5, line 9: Is "said metal foil" referring to one of the layers of the metal foil or another "metal foil"?

Claims 5-13 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: removing the first resist pattern; forming a second resist patter on the areas of the metal foil; selectively forming an exposed portion of the areas of the metal foil using the second resist pattern; etching the metal foil at the exposed portion; removing the second resist pattern; forming a dielectric layer on the insulating substrate and on the plating layer and the lines on the metal foil; forming an opening in the plating layer; and performing plating on the opening.

Claims 1-13 are ambiguous as being incomplete for omitting essential steps and competitors would be unable to discern the bounds of the invention.

# Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3726

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1-4, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Asai et al (US 6,828,510) in view of Uchikawa et al (US 6,531,661).

Asai discloses preparing an insulating substrate (14 and 20); a layer of metal foil (24); a plating layer (28); 18 are lands; polishing to adjust a thickness of the plating layer (col. 20, lines 40-44); forming lines (26 are removed to form lines 24 and 32 in Fig. 2C); 40a are dielectric layer covering the insulating substrate, the land and the lines; 42 are opening; 42 is a plating, except for forming areas of the metal foils not covered by the plating layer into lines.

Uchikawa discloses forming areas of the metal foils not covered by the plating layer into lines (Figs. 2E shows a plating layer 6A covering 30 at the opening 5A; 30a are not covered by 6A on the top surface and forming lines).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Asai by forming areas of the metal foils not covered by the plating layer into lines, as taught by Uchikawa, for the purpose of electrically communicating between two opposing surfaces.

## Response to Arguments

7. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

## Interviews After Final

8. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is

Art Unit: 3726

convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. <u>Interviews merely to restate arguments of record or to discuss new limitations will be denied</u>. See MPEP 714.13 and 713.09.

### Conclusion

- 9. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
- 10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3726

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The examiner can normally be reached on 5:30 AM to 1:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
